1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 18, 19 and 22-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Melvej (5,431,944).

Melvej discloses a batter composition for coating potato strips including ungelatinized, unmodified potato starch and about 40% rice flour (column 6, lines 49-51 and column 7, lines 61-65).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 18, 19 and 22-25 are also rejected under 35 U.S.C. 103(a) as being unpatentable over Melvej in view of Woerman et al.

It would have been obvious to use a cross-linked potato starch, as the potato starch in Melvej, having a cross-linking level of less than 400 ppm, as claimed by applicant, since it is old to prepare a batter for coating potato strips wherein said batter includes rice flour and cross-linked potato starch having a cross-linking level of 213 ppm, as evidenced by Woerman et al (Table 2).

Art Unit: 1761

5. The disclosure is objected to because of the following informalities: The status of parent SN 09/434,749 has been omitted from the amendment to page 1 of the specification.

Appropriate correction is required.
